Patent No. US/0020155114A1

GENERAL INFORMATION:
APPLICANT: Marks, James D
APPLICANT: Amersdorfer, Peter
TITLE OF INVENTION: Therapeutic Monoclonal Antibodies That Neutralize
TITLE OF INVENTION: Therapeutic Monoclonal Antibodies That Neutralize
TITLE OF INVENTION: Botulinum Neurotoxins
FILE REFERENCE: 2500.1170SO
CURRENT APPLICATION UNMER: US/09/144,886
CURRENT FILING DATE: 1998-08-31
NUMBER OF SEQ ID NOS: 98
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              OTHER INFORMATION: Description of Artificial Sequence: BONT/A clone; OTHER INFORMATION: 1G7 region VH epitope 1

j Patent No. 6334051
is GENERAL INFORMATION:
TITLE OF INVENTION: CELL TYPE SPECIFIC GENE TRANSFER USING RETROVIRAL VECTORS
TITLE OF INVENTION: CONTAINING ANTIBODY-ENVELOPE FUSION PROTEINS AND WILD-TYPE
FILE REFERENCE: 97,216-L
CURRENT APPLICATION NUMBER: US/09/135,121B
CURRENT FILING DATE: 1998-08-17
PRIOR APPLICATION NUMBER: US 08/203,616
PRIOR PELING DATE: 1997-08-28
PRIOR PELING DATE: 1994-03-04
PRIOR FILING DATE: 1994-03-04
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ; OTHER INFORMATION: B6.2 gene encoding single chain antibody against hapten DNP
